

# EPILEPSY

## It's a matter of facts.

Epilepsy is a neurological disorder characterized by recurring seizures. 1 in 100 people will have recurrent seizures or 'epilepsy'.

With proper diagnosis and treatment, 70% of Canadians with epilepsy will live healthy lives. If you are one of the 70% please consider telling others how epilepsy affects you and your family. You can make a donation of time or money to the Canadian Epilepsy Alliance.

If you are one of the 30% of Canadians with epilepsy whose seizures are not controlled we are here to help with education, support and employment programs.

We need your help! To learn how you can receive support, donate or volunteer, go to [www.epilepsymatters.com](http://www.epilepsymatters.com). To find the agency nearest you, call 1-866 EPILEPSY.
