Supporting Epilepsy

Purple Day - March 26

Around The World! 

Did you know...

- Epilepsy is one of the most common, serious, neurological disorders affecting approximately 300,000 people in Canada and 50 million people worldwide.
- Thousands of new cases are diagnosed every year in Canada.
- Epilepsy can be associated with profound physical, psychological and social consequences.
- People with epilepsy have an increased risk of physical injury and sudden death. Improving seizure control by ensuring access to specialized care may reduce the risk of sudden death.
